

Biological Oceanography Seminar - Spring 2009

All seminars will be on Fridays at 2 - 3 pm in Room 327 of the Oceanography-Statistics Building.

Date	Speaker	Affiliation	Host	Title
January 9 th	Joel Kostka	FSU-Oceanography		Overview/ Orientation
January 16 th	NO SEMINAR			OCEANOGRAPHY FACULTY RETREAT- NO SEMINAR
January 23 rd	Janie Wulff Marine biologist, sponge expert	FSU-Biology	Joel Kostka	Sticking with simplicity: facile regeneration, versatile morphology, and diverse collaborations promote persistence of the most basal metazoans
January 30 th	Lindsay Scheef	FSU-Oceanography	Joel Kostka	TBA
February 6 th	Hans Pearl Phytoplankton ecology, expert on nutrient limitation and harmful algae	Univ. of North Carolina-Marine Sciences	Mike Wetz	Controlling eutrophication along the freshwater-marine continuum: The need for dual nutrient (N and P) reductions
February 13 th	Don Levitan Evolution/ ecology of marine invertebrates	FSU-Biology	Joel Kostka	TBA
February 20 th	Mike Santema	FSU-Oceanography	Joel Kostka	TBA
February 27 th	Chuck Fisher Physiology and ecology of deepsea organisms	Penn State Univ.- Biology		Metazoan adaptations to life in extreme environments of the deep Gulf of Mexico
March 6 th	Puja Jasrotia			Denitrifying bacteria in the terrestrial subsurface
March 20 th	Jamie Foster Marine microbiology, astrobiology	Univ. of Florida- Microbiology	Stefan Green	Mechanisms of development in modern marine microbialites
March 27 th	Stefan Bourgojn/ Lindsay Chipman			TBA
April 3 rd	Nicole Lopanik Natural products from the sea	Georgia State Univ- Biology	Joel Kostka	TBA
April 10 th	Andy Canion/ Amanda Tazaz			TBA

April 17th	Mike Heithaus Marine biology, shark expert	FIU- Biology	Joel Kostka	TBA
April 24th	Hugh MacIntyre Phytoplankton ecology, photosynthetic modeling	Dauphin Island Sea Lab	Andy Canion	TBA
